

Hooves

Horns

Claws

Hooves, Horns, Claws

1. Demonstrate hand motions

2. Have students practice

3. Directions:

Hold one hand palm up

Make a fist with the other hand

Hit palm with fist three times while saying "Hooves!
Horns! Claws!"

Hold out fist hand in one of three positions for all to see

4. Scoring

If all are claws everyone loses because there is no food

If none are claws everyone loses because hoofed animals
used all food and starved

If there are more hooves than anything else the hoofed
animals win because they were able to escape
successfully

In all other cases, the claws catch the hooves and the
horns stab the claws
