John C. Morris, M.D., is the Harvey A. and Dorismae Hacker Friedman Distinguished Professor of Neurology, Pathology and Immunology at Washington University in St. Louis. He is also the

Director of the Center for Aging, the Memory and Aging Project, and the Charles F. and Joanne Knight ADRC. In 2013, he received the Academy of Science - St. Louis Outstanding St. Louis Scientist Peter H. Raven Lifetime Achievement Award.

Alzheimer's disease is the only cause of death among the top 10 in America that currently has no way to prevent, cure or even slow its progression. Alzheimer's is predicted to cost the nation \$1.2 trillion by 2050. Join us for a look at current trends and recent momentum in Alzheimer's disease research and clinical prevention trials with John C. Morris, M.D., one of the world's foremost Alzheimer's disease researchers.
