Radiographs (pictures taken with x-rays) help our veterinary staff check the health of animals in our care.

The BAMBOO SHARK radiographs were taken to find out why it stopped eating.

This KING PENGUIN was limping. Radiographs were used to check bones and joints for abnormalities.

This LEOPARD TORTOISE had breathing problems. Radiographs helped check the health of its lungs.

GUESS THE ANIMALS IN THESE RADIOPHGRAPHS!

Using the WORD BANK above, write your best guesses in the spaces below! Check your answers at the bottom of the page when you're finished.
