

Forest Park Owls: Hiding in Plain Sight

Tuesday, May 10, 2016

7:30 to 9 p.m

Anheuser-Busch Theater

The Living World

Free admission

No reservations needed

Mark H.X. Glenshaw is an award-winning naturalist who has observed and documented great horned owls in Forest Park in St. Louis since December 2005.

Great horned owls are the most widespread, commonly-found owl in North America. They live almost everywhere from our most remote wild areas to urban parks. Mark's talk will cover how he found these owls in Forest Park, basic facts about the species and the different behaviors he has seen and documented. This includes hooting, hunting, mating and rearing of young, with photos and videos to illustrate these behaviors. Watch as one of our top and most adaptable predators comes to vivid life. Do not be surprised to find yourself looking for owls afterwards!
