

# Join the Zoo for our Community Climate Forum Webinar Series

Saint Louis Zoo experts will discuss ways to engage in solutions with our community to help curb climate change impacts on our region and beyond. Webinars will include presentations with plenty of time for discussion.

## Webinar 8: Combating Climate Change with Native Plants

Presented by: Louise Bradshaw, Director of Education, and special guest, Jean Ponzi, Green Resources Manager, Earth Ways Center of Missouri Botanical Garden

**Thursday, April 14, 2022**

**5:30 – 6:30 p.m.**

### About this Webinar:

Can our personal and community spaces help mitigate climate change? What role do native plants play in climate and ecosystem health? Join Louise and Jean as they discuss why building a relationship with native plants can help transform our climate impacts. Illustrated by both St. Louis and Zoo-specific examples, this talk invites all ages to join this community-powered conservation movement.

Webinars will be held the second Thursday of every month. To learn more, including webinar dates and topics, visit [stlzoo.org/climatechange](http://stlzoo.org/climatechange).
