

Curiosity Revealed the Cat: Domesticating the Cat Genome

Wednesday, April 1, 2015
7:30 - 9 p.m.
Anheuser-Busch Theater
The Living World
Admission is free.
No reservations needed.

Featured Speaker: Wes Warren, Ph.D., Associate Professor of Genetics and Assistant Director, Comparative Genomics, The Genome Institute, Washington University in St. Louis

Initially launched to study hereditary diseases in domestic cats and offer insight into human diseases that are in some cases similar, the cat genome sequencing project has also shed light on the genetic signatures of cats' unique biology and survival skills and jump-started knowledge on the evolution of cat domestication.

Join Washington University Genome Institute genetics professor, and the study's senior author, Wes Warren, for the inside scoop on the molecular events and genetic roots associated with the domestication of our feline friends.
